

Cryptozmarket

What it is, how it works and why I should join

Earn money from items you don't use anymore

Get crypto without intermediaries such as Banks, Exchanges, etc

PRIVATE TRANSACTIONS

The main issue with transactions between Buyers and Sellers, is trust

We overcome the issue by creating a smart contract. We trust in Blockchain technology

SOCIAL NETWORK

We created a customized social platform exclusively for Crypto owners & lovers

Exchange in opinions, securing your anonymity within Cryptozmarket. We do not keep personal data

Minimal fees

Cryptozmarket earns fees via User transactions

All other services through our Platform are for free

CIRCULAR ECONOMY

By selling unnecessary used items, you provide the opportunity to someone else

to purchase and use those again, thus contributing to promoting Circular Economy values

Cryptozmarket

Interaction through Smart Contracts

SELLER

Creates an ad within the Cryptozmarket platform. Marks item value in Stablecoins (currently BUSD)

-BUYER- BUY NOW

After the "Buy Now" process is completed, Cryptozmarket will open a pop-up window with full details of the order.

- Item value
- Transportation fees
- Cryptozmarket fees

SELLER

The Seller will receive a notification through the Cryptozmarket platform and an email will be sent too. At this stage the order can be rejected. In that case the Stablecoins will be returned to the Buyer. If the Order is accepted, the first step of the contract is fulfilled

BUYER

Buyer will receive a notification through the Cryptozmarket platform and an email will be sent too mentioning updated Order details. At this stage is of great importance to carefully verify that Shipping details are accurate

BUYER ALL GOOD

After verifying that Shipping details are accurate, Buyer releases the remaining Stablecoins to the Seller (Item Value), by clicking "Complete Transaction". Then the Smart Contract is completed

BUYER

Selects the product by clicking "BUY NOW"
Cryptozmarket verifies whether a wallet in the browser exists and if it has passed the BS Chain network control or not. If there is not a verification of the above, the Buyer must approve the process by following instructions.

BUYER

Following that, the Digital Wallet will request the Buyer to create the smart contract for the transaction, that will lead to an order
Then, the Stablecoins will be locked to the Blockchain and will initially remain there

SELLER ACCEPTS

After clicking on the "Accept Transaction" button, the Seller will receive to his Wallet the value of the Transportation Fees. Then, proceeds with shipping the Item and updating the Cryptozmarket Platform with Track Number and Courier details

BUYER CANCELS

Buyer can reject the transaction within 24 hours from Order details receipt, for any reason whatsoever. Then, an Item value refund occurs

PROFILE XP

After the Smart Contract successful completion, Seller receives the corresponding XP to his Profile. That way, User is certified as a trusted Seller and levels up in the Cryptozmarket

Cryptozmarket

Future Additions and Ambitions

The Seller will be rewarded with NFT of a value proportional to the XP already collected to his profile

Earned NFT's can be applied on Users profile, indicating a Trusted Seller Constitute or can be simply sold to gain money

Group Function

A Function will be added to the Cryptozmarket Network which will enable Users

to create their own Groups of Friends with similar interests and preferable topics

For Business

Businesses all around the Globe will able to sell their products through Cryptozmarket

User will be able to choose between Businesses or Private Individuals for their purchases
